Product	Configuration description
Drive Mode	Screw Nut Drive Control
Control System	SSID Intelligent Control System
Door Lock System	Electronic and Mechanical Safety Interlock
Silent Brake System	SSG Brake System
Rolling Guide Shoes	Silent Operation, No Lubrication
Automatic Lubrication System	Continuous Lubrication, Extends Core Components' Lifespan
Wireless Emergency Communication	Can Store 3 Emergency Contact Numbers, One-touch Dial
Automatic Leveling on Power Outage	Dual Protection (Battery + Mechanical Handle)
Touch Control External Call	Precise Control, Easy Operation
Built-in Functions	SAFS Full Safety System, ID Intelligent Elevator Door, BASS Battery Monitoring System, OLP Overload Protection, UPS Backup Power Emergency Descent, etc.
Door Lock System	Electronic and Mechanical Safety Interlock
Emergency Brake	Respond to All Emergencies
Control Panel	Touch Panel, Precise Control, Easy Operation
Platform Safety Frame	Emergency Stop on Touch
Speed	Standard: 0.15m/s Optional: 0.3m/s
Shaft Profiles	Using High Grade (6005-T5) Aerospace Aluminum Profiles
Shaft Glass	Using Double-layer Laminated Explosion-proof Tempered Glass (5mm + 0.76mm + 5mm)
Sustainability	95% of Product Components are Recyclable
Technical Standards	Referencing European Standards EN81-41, European Machinery Directive 2006/42/EC
